Of the six outer planets, Mars, commonly called the Red Planet, is the closest to Earth. Mars, 4,200 miles in diameter and 55% of the size of Earth, is 34,600,000 miles from Earth, and 141,000,000 miles from the Sun. It takes this planet, along with its two moons, Phobos and Deamos, 1,88 years to circle the Sun, compared to 365 days for the Earth. For many years, Mars had been thought of as the planet with the man-made canals, supposedly discovered by an Italian

astronomer, Schiaparelli, in 1877. With the United States spacecraft Viking I's landing on Mars in 1976, the man-made canal theory was proven to be only a myth. Viking I, after landing on the soil of Mars, performed many scientific experiments and took numerous pictures. The pictures showed that the red color of the planet is due to the reddish, rocky Martian soil. No biological life was found, though it had been speculated by many scientists. The Viking also

monitored many weather changes including violent dust storms. Some water vapor, polar ice and permafrost (frost below the surface) were found, indicating that at one time there were significant quantities of water on this distant planet. Evidence collected by the spacecraft shows some present volcanic action, though the volcanoes are believed to be dormant if not extinct.

52. **Which of the following is not true?**

- A) Martian soil is rocky
- B) Mars has two moons
- C) It takes longer for Mars to circle the Sun than it takes Earth
- D) Mars is larger than Earth

The world is **undergoing** a **rapid** change. That is, views, opinions, fashion, and even traditions are changing rapidly. The old cannot **adapt** themselves to these changes easily. If there is one, then, we can say that it is the old who create it. Everyone **is of the opinion** that the young are, **after all**, human beings-people just like their parents. There is only one difference between an old man and a young man: the young man has got a bright future before, him and the old one has got a lot of experience behind him.

55. It is maintained that the old.....

- B) have always been open to the change
- C) like the change more than anything else.
- D) are the only ones who get accustomed to-the change.

- B) never- talk about their past experiences
- C) create the problem of the generation gap
- D) try to adapt themselves to the changes

57. The old differ from the young in that.....

- A) the young are worse in adapting themselves to changes
- B) the latter are not as experienced as the former

- C) the old are better in understanding the young
D) the former do not know what to expect from life

Read the text. Then choose the correct answer to questions 58-60.

This summer Britons are predicted to spend £6 billion on package holidays. According to a new survey, the happiest holiday-makers are those who book with small, specialist companies. The survey suggests that choosing the right tour company may be more important than choosing the right resort or hotel. So, how can you make sure you end up with the sort of holiday you had in mind? If your budget is tight, work out exactly what you can afford. Then, find a travel agent who has time to listen to your requirements. This can be hard though, as many large high street chains set sales targets for their staff, and may even limit the amount of time employees spend per customer.

58. **The recent survey mentioned** in the passage **shows** that
A) small travel agencies usually satisfy their customers better
